# Subject Index

**A**

*Actinidia deliciosa*. *See* Kiwifruit
AFLP. *See* Amplified fragment length polymorphism
African-derived mitochondria 323–330
Amazon river dolphin *Inia* sp., evolutionary genetics in 312–322
Amplified fragment length polymorphism (AFLP)
  in marine sponge 27–36
  in peach 352–358
Amur leopard. *See* Far Eastern leopard
Aneuploids, cotton mutants and 130–132
*Anopheles gambiae s.s.*, differentiation of 249–253
*Antirrhinum* nuclear microsatellites 217–221
Ant, telomeric sequence in 282–285
*Apis mellifera*. *See* Honey bee
*Arachis hypogaea* L. *See* Groundnut
*Astyanax mexicanus*. *See* Cave fish
*Avena fatua* L., triallate resistance in 48–50
*Axinella corrugata*. *See* Marine sponge

**B**

Backcrossing, molecular markers for 214–217, 383
*Barbus*, lineage of 140–147
B-A translocations 42–47
Bayesian model 406–414
Beacon fish, caudal spotting in 285–286
Bell pepper, flaccid mutant in 380–382
Biology, of ocean life 461
Black-footed ferret, genetic diversity in 231–237
Black-tailed deer, browsing and terpene production in 370–376
Black walnut, microsatellite from 58–60
Blue-breasted quail, mitochondrial DNA in 439–444
Blue mussel, multilocus heterozygosity and survival in 238–248
*Bos taurus*. *See* South American native cattle breeds

**C**

*Canis familiaris*. *See* Dog
*Capsicum annuum*. *See* Bell pepper
*Catharanthus roseus*. *See* Periwinkle
Cattle
  mitochondrial DNA in Creole Caribbean 429–432
  mitochondrial DNA in South American native breeds 323–330
Caudal spotting, in beacon fish 285–286
Cave fish, genetic linkage mapping of 19–21
*Cercopithecus aethiops*. *See* Savanna monkey
cGH. *See* Chicken growth hormone
*Chamaecyparis nootkatensis*. *See* Yellow-cedar
Charles River "hairless" rat 210–213
Chia, genetics in 52–55
Chiasmata 125–129
Chicken
  growth and body composition 107–118
  lampbrush chromosome 1 125–129
  plumage coloration 73–76
Chicken growth hormone (cGH), intron 4 of 277–279
Chloroplast DNA (cpDNA), in kiwifruit 293–300
Chromosomes
  chicken 125–129
  maize B-A 42–47
  pig 1–8
  *See also* Genetic linkage mapping
*Citrus-Poncirus*, mitochondrial DNA in 174–178
Classification methods 260–269
Coloration
  aleurone in *Zea mays* 421–428
  chicken and Japanese quail plumage 73–76
  common bean 148–152
  meadow vole 209–210
  peppered moth 86–90
  periwinkle 55–58
  pig 1–8
Colubroid snake, microsatellites from 63–66
Common bean, genetic linkage mapping of 148–152
Computer program
  for analysis of isolation by distance 153–154
  for computing fully informative genotype frequencies in complex breeding schemes 227–228
  efficient algorithm for additive kinship matrix 453–456
  for graphical comparison and plotting of genetic maps 225–227
  for graphical presentation of linkage mapping and quantitative trait loci 77–78
  for numerical optimization of population size in marker-assisted backcross 383–384
  for parentage analysis 463–464
  to predict selection response and rate of inbreeding in livestock breeding programs 456–458
  for quantitative evaluation of biological shapes based on elliptic Fourier descriptors 384–385
Conservation genetics, of Far Eastern leopard 303–311
Cotton
  fuzzless seed locus in 359–364
  *Ligon lintless* in 221–224
  mutants and aneuploids in 130–132, 221–224
*Coturnix chinensis*. *See* Blue-breasted quail
cpDNA. *See* Chloroplast DNA
Creole Caribbean cattle 429–432
Cu/Zn superoxide dismutase gene, canine 119–124
Cycad, population genetics of 133–139
*Cycas seemannii* A.Br.(Cycadaceae), genetic variability in 133–139
Cytochrome *b* gene, in Amazon river dolphin 312–322

**D**

Dance language, of honey bee 170–173
Disease lesion mimic leaf trait, in groundnut 50–52

Conservation genetics, of Far Eastern leopard 303–311
Cotton
  fuzzless seed locus in 359–364
  *Ligon lintless* in 221–224
  mutants and aneuploids in 130–132, 221–224
*Coturnix chinensis*. *See* Blue-breasted quail
cpDNA. *See* Chloroplast DNA
Creole Caribbean cattle 429–432
Cu/Zn superoxide dismutase gene, canine 119–124
Cycad, population genetics of 133–139
*Cycas seemannii* A.Br.(Cycadaceae), genetic variability in 133–139
Cytochrome *b* gene, in Amazon river dolphin 312–322

**D**

Dance language, of honey bee 170–173
Disease lesion mimic leaf trait, in groundnut 50–52

Divergence times 157–164
DNA
  chloroplast 293–300
  marine sponge 27–36
  *Secale* 339–345
  *See also* Genetic linkage mapping; Microsatellites; Mitochondrial DNA; Random amplification of polymorphic DNA
Dog
  Cu/Zn superoxide dismutase gene in 119–124
  microsatellites 70–73
Domestic rabbit, human intervention in 205–209
*Dromaius novaehollandiae*. *See* Emu
*Drosophila pseudoobscura*, founder effect in 415–420

E

Earthworm, rDNA in 279–282
Emu, microsatellites in 100–106, 376–380
European natricine snakes, microsatellites from 63–66
*evergrowing* gene, in peach 352–358
Evolutionary genetics
  Amazon river dolphin *Inia* sp. 312–322
  cave fish 19–21
  developmental pathways 460–461
  Iberian barbels 140–147
  *Secale* 339–345

F

FALS. *See* Familial amyotrophic lateral sclerosis
Familial amyotrophic lateral sclerosis (FALS) 119–124
Far Eastern leopard, conservation genetics of 303–311
FITMAPS computer program 225–227
Flat oyster, microsatellites in 331–338
Founder effect, in *Drosophila pseudoobscura* 415–420
Fusarium wilt, in pea 291–293
Fuzzless seed locus, in upland cotton 359–364
*Fw* gene 291–293

G

Genetic analysis. *See* Genetic linkage mapping
Genetic engineering 461–462
Genetic linkage mapping
  cave fish 19–21
  Charles River "hairless" rat 210–213
  chicken 125–129
  computer program for 77–78, 227–228, 458–459
  earthworm 279–282
  *evergrowing* gene in peach 352–358
  Iberian barbel 140–147
  mahogany 287–291
  marine sponge 27–36
  pea 291–293
  *Pinus peuce* Griseb. 60–63
  soybean 179–184, 447–452
  *See also* Chromosomes; Random amplification of polymorphic DNA
Genetics
  black-footed ferret 231–237
  canine 119–124
  chia 52–55
  chicken 107–118
  *Cycas seemannii* A.Br. (Cycadaceae) 133–139
  emu 100–106, 376–380
  engineering 461–462
  Far Eastern leopard 303–311
  leafy cactus 193–200
  *Paspalum dilatatum* 300–302
  *Piper cernuum* 365–369
  rainbow trout 91–99
  *Rhus* 37–41
  yellow-cedar and western redcedar 370–376
  *See also* Evolutionary genetics; Genetic linkage mapping; Population genetics
*Glycine max* (L.) Merr. *See* Soybean
*Gossypium hirsutum* L. *See* Cotton
Groundnut, disease lesion mimic leaf trait in 50–52

H

HCSMA. *See* Hereditary canine spinal muscular atrophy
*Hemigrammus ocellifer*. *See* Beacon fish
Hereditary canine spinal muscular atrophy (HCSMA) 119–124
Honey bee, dance language of 170–173
Housefly, mitochondrial DNA in 254–259
Humpback whale, mitochondrial DNA in 389–399
Hybridization
  emu 100–106
  *Rhus* 37–41
  treefrog 81–85
*Hyla versicolor*. *See* Treefrog

I

IBD computer program 153–154
Iberian barbel, evolutionary lineage of 140–147
Inheritance. *See* Genetics; *specific plants and animals*
*Inia* sp., molecular biology and evolution in 312–322
Intelligence 462–464
Intervening transcribed spacer (ITS), in marine sponge 27–36
Intron 4, of chicken growth hormone 277–279
*Ipomoea batatas*. *See* Sweet potato
ITS. *See* Intervening transcribed spacer

J

*Jaera albifrons* complex, population genetics of 432–439
Japanese quail, plumage coloration in 73–76
*Juglans nigra* L. *See* Black walnut

K

Kiwifruit, chloroplast DNA in 293–300

L

Lake trout, classification of 260–269
Leafy cactus, genetics of 193–200
*Ligon lintless*, in cotton 221–224
Linkage analysis/mapping. *See* Genetic linkage mapping
*Luciobarbus*, linkeage 140–147

M

Mahogany, genetic linkage mapping of 287–291
Maize
  aleurone color in 421–428
  B-A tertiary trisomics 42–47
  restorer cytoplasm for *ms10* gene 444–447
Malaria, from mosquito 249–253
Mali (West Africa), mosquito in 249–253
Mammal divergence times 157–164
MapChart computer program 77–78
Marine sponge, genetic markers for 27–36
Maternal effects, on morphological and behavioral traits 400–405
Mating systems
  hunchback whale 389–399
  multiple partners 406–414
  white pine weevil 165–169
MDM computer program 227–228
Meadow vole, blond coat color in 209–210
*Megaptera novaeangliae*. *See* Humpback whale
Meiosis, mouse 201–205
Melanism, in peppered moth 86–90
Microsatellites
  *Anopheles gambiae s.s.* 249–253
  *Antirrhinum* nuclear 217–221
  black walnut 58–60
  colubroid snake 63–66
  dog 70–73
  domestic rabbit 205–209

emu 100–106, 376–380
European flat oyster 331–338
Far Eastern leopard 303–311
mahogany 287–291
tilapia 270–276
white pine weevil 67–70, 165–169
*See also* Simple sequence repeat
*Microtus pennsylvanicus*. *See* Meadow vole
Mismatch repair (MMR) 201–205
Mississippi Obsolete Variety Collection (MOVC) 359–364
Mitochondrial DNA (mtDNA)
in Amazon river dolphin 312–322
in blue-breasted quail 439–444
in *Citrus-Poncirus* 174–178
in Creole Caribbean cattle 429–432
in domestic rabbit 205–209
in Far Eastern leopard 303–311
in housefly 254–259
in humpback whale 389–399
in savanna monkey 9–18
in South American native cattle 323–330
MLH. *See* Multilocus heterozygosity
MMR. *See* Mismatch repair
Molecular biology, and evolution in *Inia* sp. 312–322
Molecular markers
for backcrossing 214–217
for white pine weevil 165–169
Mosquito, in Mali (West Africa) 249–253
Motor neuron disease, SOD1 gene in 119–124
Mouse meiosis 201–205
MOVC. *See* Mississippi Obsolete Variety Collection
*ms10* gene, restorer cytoplasm for 444–447
mtDNA. *See* Mitochondrial DNA
Multilocus heterozygosity (MLH), in blue mussel 238–248
*Musca domestica* L. *See* Housefly
*Mustela nigripes*. *See* Black-footed ferret
Mutations
*Capsicum annuum* 380–382
cotton 130–132
linked deleterious 22–26
rainbow trout 91–99
*Mytilus edulis* L. *See* Blue mussel

N

Narrow leaflet gene, in soybean 346–351

O

Ocean life biology 461
*Octodrilus complanatus*. *See* Earthworm
*Odocoileus hemionus*. *See* Black-tailed deer
*Oncorhynchus mykiss*. *See* Rainbow trout
*Oreochromis aureus*. *See* Tilapia
*Oryctolagus cuniculus*. *See* Rabbit
*Ostrea edulis* L. *See* Flat oyster

P

*Panthera pardus orientalis*. *See* Far Eastern leopard
PARENTE computer program 458–459
*Paspalum dilatatum*, random amplification of polymorphic DNA in 300–302
Pea, fusarium wilt in 291–293
Peach, *evergrowing* gene in 352–358
*Pereskia guamacho*. *See* Leafy cactus
Periwinkle, flower color in 55–58
*Phaseolus vulgaris* L. *See* Common bean
Pig, coat color in 1–8
*Pinus peuce* Griseb., genetic linkage mapping of 60–63
*Piper cernuum*, genetic diversity in 365–369
*Pissodes strobi* [Peck] [Coleoptera: Curculionidae]. *See* White pine weevil
*Pisum sativum* L. *See* Pea
Plant breeding 229
Pollen, in sweet potato 185–192
Polymerase chain reaction (PCR), treefrog 81–85
Popmin computer program 383–384
Population genetics
cycad 133–139
housefly 254–259
hunchback whale 389–399
*Jaera albifrons* complex 432–439
polyploid 81–85
white pine weevil 165–169
Primate divergence times 157–164
*Prunus persica* (L.) Batsch. *See* Peach

Q

QTL. *See* Quantitative trait loci
Quantitative trait loci (QTL)
cave fish 19–21
chicken 107–118
computer program for 77–78

R

*r1* locus inhibitor, of aleurone in *Zea mays* 421–428
Rabbit, human intevention with domestic 205–209
Rainbow trout, genetic sex determination in 91–99
Random amplification of polymorphic DNA (RAPD)
in cave fish 19–21
in *Paspalum dilatatum* 300–302
RAPD. *See* Random amplification of polymorphic DNA
rDNA, in earthworm 279–282
Recombination rate 22–26
Regressive evolution, in cave fish 19–21
Reproductive behavior. *See* Mating systems
Restorer cytoplasm, for *ms10* gene in maize 444–447
Restriction fragment length polymorphism (RFLP)
in citrus 174–178
in savanna monkey 9–18
RFLP. *See* Restriction fragment length polymorphism
*Rhus*, genetic variation and hybridization in 37–41
RP3 interval, canine 70–73

S

*Salvelinus namaycush*. *See* Lake trout
*Salvia hispanica* L. *See* Chia
Savanna monkey, mitochondrial DNA in 9–18
*Secale*, simple sequence repeat in 339–345
SelAction computer program 456–458
Sex determination, in rainbow trout 91–99
Sex ratios, in tilapia 270–276
SHAPE computer program 384–385
SHOWMAP computer program 225–227
Simple sequence repeat (SSR)
*Ligon lintless* 221–224
*Secale* 339–345
*See also* Microsatellites
Single-stranded conformation polymorphism (SSCP), in marine sponge 27–36
SMV. *See* Soybean mosaic virus
SOD1. *See* Superoxide dismutase
South American native cattle breeds, mitochondrial DNA in 323–330
Soybean
genetic linkage mapping of 179–184, 447–452
narrow leaflet gene in 346–351
Soybean mosaic virus (SMV) 179–184, 447–452
SSCP. *See* Single-stranded conformation polymorphism
SSR. *See* Simple sequence repeat
Superoxide dismutase (SOD1), canine Cu/Zn 119–124
Sweet potato, 2*n* pollen in 185–192
*Swietenia macrophylla* King (Meliaceae). *See* Mahogany

T

*Tapinoma nigerrimum*. *See* Ant
Telomeric sequence
in ant 282–285
in earthworm 279–282

Terpene production, and black-tailed deer browsing 370–376
*Thuja plicata*. *See* Western redcedar
Tilapia, sex ratios in 270–276
Treefrog, hybridization between lineages of 81–85
Triallate resistance, in *Avena fatua* L. 48–50
2*n* pollen, in sweet potato 185–192

**W**

West Africa, mosquito in 249–253
Western redcedar, genetic identities in 370–376
White pine weevil
  mating systems 165–169
  microsatellites 67–70, 165–169

**Y**

Yellow-cedar, genetic identities in 370–376

**Z**

Zao18 soybean, resistance to soybean mosaic virus in 447–452
*Zea mays*, aleurone color in 421–428

# Title Index

### A

African-Derived Mitochondria in South American Native Cattle Breeds (*Bos taurus*): Evidence of a New Taurine Mitochondrial Lineage 323–330

Allozyme Diversity and Genetic Structure of the Leafy Cactus (*Pereskia guamacho* [Cactaceae]) 193–200

Association Between Loci With Deleterious Alleles and Distorted Sex Ratios in an Inbred Line of Tilapia (*Oreochromis aureus*) 270–276

### B

A Bayesian Model for Assessing the Frequency of Multiple Mating in Nature 406–414 *The Biology of the Deep Ocean* (book review) 461

A Blond Coat Color Variation in Meadow Vole (*Microtus pennsylvanicus*) 209–210

### C

A Case of Chloroplast Heteroplasmy in Kiwifruit (*Actinidia deliciosa*) That is Not Transmitted During Sexual Reproduction 293–300

Caudal Spotting in the Beacon Fish (*Hemigrammus ocellifer* Characidae) 285–286

Characterization of Genetic Markers for In Vitro Cell Line Identification of the Marine Sponge *Axinella corrugata* 27–36

Characterization of Three Microsatellite Loci Linked to the Canine RP3 Interval 70–73

The Charles River "Hairless" Rat Mutation Maps to Chromosome 1: Allelic With *Fuzzy* and a Likely Orthologue of Mouse *Frizzy* 210–213

Comparisons of Likelihood and Machine Learning Methods of Individual Classification 260–269

Complementary Action of Two Independent Dominant Genes in Columbia Soybean for Resistance to Soybean Mosaic Virus 179–184

Complete Nucleotide Sequence of the *Coturnix chinensis* (Blue-Breasted Quail) Mitochondriial Genome and a Phylogenetic Analysis With Related Species 439–444

Conservation Genetics of the Far Eastern Leopard (*Panthera pardus orientalis*) 303–311

Conservation of $(TTAGG)_n$ Telomeric Sequences Among Ants (Hymenoptera, Formicidae) 282–285

Crossing Over in Chicken Oogenesis: Cytological Chiasma-Based Genetic Maps of the Chicken Lampbrush Chromosome 1 125–129

### D

Different Levels of Human Intervention in Domestic Rabbits: Effects on Genetic Diversity 205–209

Disparity in Population Differentiation of Sex-Linked and Autosomal Variation in Sibling Species of the *Jaera albifrons* (Isopoda) Complex 432–439

Distribution and Characterization of Microsatellites in the Emu (*Dromaius novaehollandiae*) Genome 100–106

### E

The Effect of Differential Reproductive Success on Population Genetic Structure: Correlations of Life History With Matrilines in Humpback Whales of the Gulf of Maine 389–399

An Efficient Algorithm for the Additive Kinship Matrix 453–456

Evidence for Long Isolation Among Populations of a Pacific Cycad: Genetic Diversity and Differentiation in *Cycas seemannii* A.Br. (Cycadaceae) 133–139

Evidence for the Lack of Mismatch-Repair Directed Antirecombination During Mouse Meiosis 201–205

*The Evolution and Genetics of Latin American Populations* (book review) 387

*The Evolution of Developmental Pathways* (book review) 460–461

Evolutionary Trends of Different Repetitive DNA Sequences During Speciation in the Genus *Secale* 339–345

Expression of the Narrow Leaflet Gene for Yield and Agronomic Traits in Soybean 346–351

### F

FITMAPS and SHOWMAP: Two Programs for Graphical Comparison and Plotting of Genetic Maps 225–227

### G

Gene Flow Among Geographically Diverse Housefly Populations (*Musca domestica* L.): A Worldwide Survey of Mitochondrial Diversity 254–259

*Genes, Girls, and Gamow* (book review) 464–465

Genetic Architecture of Growth and Body Composition in Unique Chicken Populations 107–118

Genetic Control of the Honey Bee (*Apis mellifera*) Dance Language: Segregating Dance Forms in a Backcrossed Colony 170–173

Genetic Differentiation of *Anopheles gambiae s.s.* Populations in Mali, West Africa, Using Microsatellite Loci 249–253

Genetic Diversity and Fitness in Black-Footed Ferrets Before and During a Bottleneck 231–237

Genetic Diversity in Natural Populations of *Piper cernuum* 365–369

Genetic Mapping of the *evergrowing* Gene in Peach [*Prunus persica* (L.) Batsch] 352–358

Genetic Variation and Evidence of Hybridization in the Genus *Rhus* (Anacardiaceae) 37–41
Genetics of Qualitative Traits in Domesticated Chia (*Salvia hispanica* L.) 52–55
Genome Scan Reveals New Coat Color Loci in Exotic Pig Cross 1–8
Genomic Location of the *Fw* Gene for Resistance to Fusarium Wilt Race 1 in Peas 291–293
Geographic Structure in the European Flat Oyster (*Ostrea edulis* L.) as Revealed by Microsatellite Polymorphism 331–338

H

Haplotype Diversity and Phylogenetic Relationships Among the Iberian Barbels (*Barbus*, Cyprinidae) Reveal Two Evolutionary Lineages 140–147
Heterologous Amplification of Microsatellite Markers From Colubroid Snakes in European Natricines (Serpentes: Natricinae) 63–66
*Human Biology of Pastoral Populations* (book review) 386–387

I

IBD (Isolation by Distance): A Program for Analyses of Isolation by Distance 153–154
The Identification and Characterization of Two Dominant *r1* Haplotype-Specific Inhibitors of Aleurone Color in *Zea mays* 421–428
Identification of a Third Fuzzless Seed Locus in Upland Cotton (*Gossypium hirsutum* L.) 359–364
Inheritance and Allelism of Resistance to Soybean Mosaic Virus in Zao18 Soybean From China 447–452
Inheritance and Linkage of Allozymes in a Balkan Endemic, *Pinus peuce* Griseb. 60–63
Inheritance of a Novel Flaccid Mutant in *Capsicum annuum* 380–382
Inheritance of Disease Lesion Mimic Leaf Trait in Groundnut 50–52
Inheritance of Flower Color in Periwinkle: Orange-Red Corolla and White Eye 55–58
Inheritance of Null Alleles for Microsatellites in the White Pine Weevil [*Pissodes strobi* (Peck) (Coleoptera: Curculionidae)] 67–70
Inheritance of Organelle DNA Sequences in a *Citrus–Poncirus* Intergeneric Cross 174–178

L

Linking Deer Browsing and Terpene Production Among Genetic Identities in *Chamaecyparis nootkatensis* and *Thuja plicata* (Cupressaceae) 370–376

M

Maize Tertiary Trisomic Stocks Derived From B-A Translocations 42–47
*The Making of Intelligence* (book review) 462–464
MapChart: Software for the Graphical Presentation of Linkage Maps and QTLs 77–78
Mapping a Cave Fish Genome: Polygenic Systems and Regressive Evolution 19–21
Maternal Effects and the Evolution of Behavioral and Morphological Characters: A Literature Review Indicates the Importance of Extended Maternal Care 400–405
MDM: A Program to Compute Fully Informative Genotype Frequencies in Complex Breeding Schemes 227–228
Microsatellite Analysis of Genetic Diversity in Wild and Farmed Emus (*Dromaius novaehollandiae*) 376–380
Mitochondrial Sequence Diversity Within a Subspecies of Savanna Monkeys (*Cercopithecus aethiops*) Is Similar to That Between Subspecies 9–18
Molecular and Phenotypic Mapping of Genes Controlling Seed Coat Pattern and Color in Common Bean (*Phaseolus vulgaris* L.) 148–152
Molecular Identification of Evolutionarily Significant Units in the Amazon River Dolphin *Inia* sp. (Cetacea: Iniidae) 312–322
Multiplexed Systems of Microsatellite Markers for Genetic Analysis of Mahogany, *Swietenia macrophylla* King (Meliaceae), a Threatened Neotropical Timber Species 287–291
Mutation in a Sex-Determining Gene in Rainbow Trout: Detection and Genetic Analysis 91–99

N

A New Search for Restorer Cytoplasm: The Restorer Cytoplasm for the Gene *ms10* Most Probably Does Not Exist in Maize 444–447
New Variations in Intron 4 of growth Hormone Gene in Chinese Native Chickens 277–279

O

Occurrence and Cytological Mechanism of *2n* Pollen Formation in a Tetraploid Accession of *Ipomoea batatas* (Sweet Potato) 185–192
Optimal Positioning of Markers to control Genetic Background in Marker-Assisted Backcrossing 214–217

P

PARENTE: Computer Program for Parentage Analysis 458–459
A Partial African Ancestry for the Creole Cattle Populations of the Carribbean 429–432
Polymorphic Microsatellites in *Antirrhinum* (Scrophulariaceae), a Genus With Low Levels of Nuclear Sequence Variability 217–221
Popmin: A Program for the Numerical Optimization of Population Sizes in Marker-Assisted Backcross Programs 383–384
Population Genetics of a Polyploid: Is There Hybridization Between Lineages of *Hyla versicolor*? 81–85
*Principles of Plant Breeding 2nd ed.* (book review) 229

R

RAPD Analysis Reveals Genetic Variability Among Sexual and Apomictic *Paspalum dilatatum* Poiret Biotypes 300–302
rDNA (18S–28S and 5S) Colocalization and Linkage Between Ribosomal Genes and $(TTAGGG)_n$ Telomeric Sequence in the Earthworm, *Octodrilus complanatus* (Annelida: Oligochaeta: Lumbricidae), Revealed by Single- and Double-Color FISH 279–282
Recent History of Melanism in American Peppered Moths 86–90
*Reshaping Life: Key Issues in Genetic Engineering, 3rd edition* (book review) 461–462

S

SelAction: Software to Predict Selection Response and Rate of Inbreeding in Livestock Breeding Programs 456–458
Selection Against Blue Mussels (*Mytilus edulis* L.) Homozygotes Under Various Stressful Conditions 238–248
Selection on a Modifier of Recombination Rate Due to Linked Deleterious Mutations 22–26

Sexual Reproduction in the While Pine Weevil (*Pissodes strobi* [Peck] [Coleoptera: Curculionidae]): Implications for Population Genetic Diversity 165–169
SHAPE: A Computer Program Package for Quantitative Evaluation of Biological Shapes Based on Elliptic Fourier Descriptors 384–385
Simple Sequence Repeat (SSR) Markers Linked to the *Ligon Lintless* ($Li_1$) Mutant in Cotton 221–224
Strong Founder Effect in *Drosophila pseudoobscura* Colonizing New Zealand from North America 415–420
Structure, Chromosomal Location, and Analysis of the Canine Cu/Zn Superoxide Dismutase (SOD1) Gene 119–124

**T**

Testing Homology of Loci for Two Plumage Colors, "lavender" and "recessive white," With Chicken and Japanese Quail Hybrids 73–76
Tests of Six Cotton (*Gossypium hirsutum* L.) Mutants for Association with Aneuploids 130–132
Thirty Polymorphic Nuclear Microsatellite Loci From Black Walnut 58–60
Two Recessive Gene Inheritance for Triallate Resistance in *Avena fatua* L. 48–50

**W**

The Wilhelmine E. Key 2001 Invitational Lecture: Estimation of Divergence Times for a Few Mammalian and Several Primate Species 157–164
